Introduction to FOSS [1]

Dirk Riehle, FAU Erlangen

FOSS A01

Licensed under CC BY 4.0 International

[1] Free and Open-Source Software

Course Goals

Learning objectives

- Learn how to use open-source software in projects and products correctly
  - Understand the software bill of materials
  - Understand open source governance
  - Understand open source license compliance
  - Understand vulnerabilities from open source
  - Understand open source regulation

Skills Required for Course

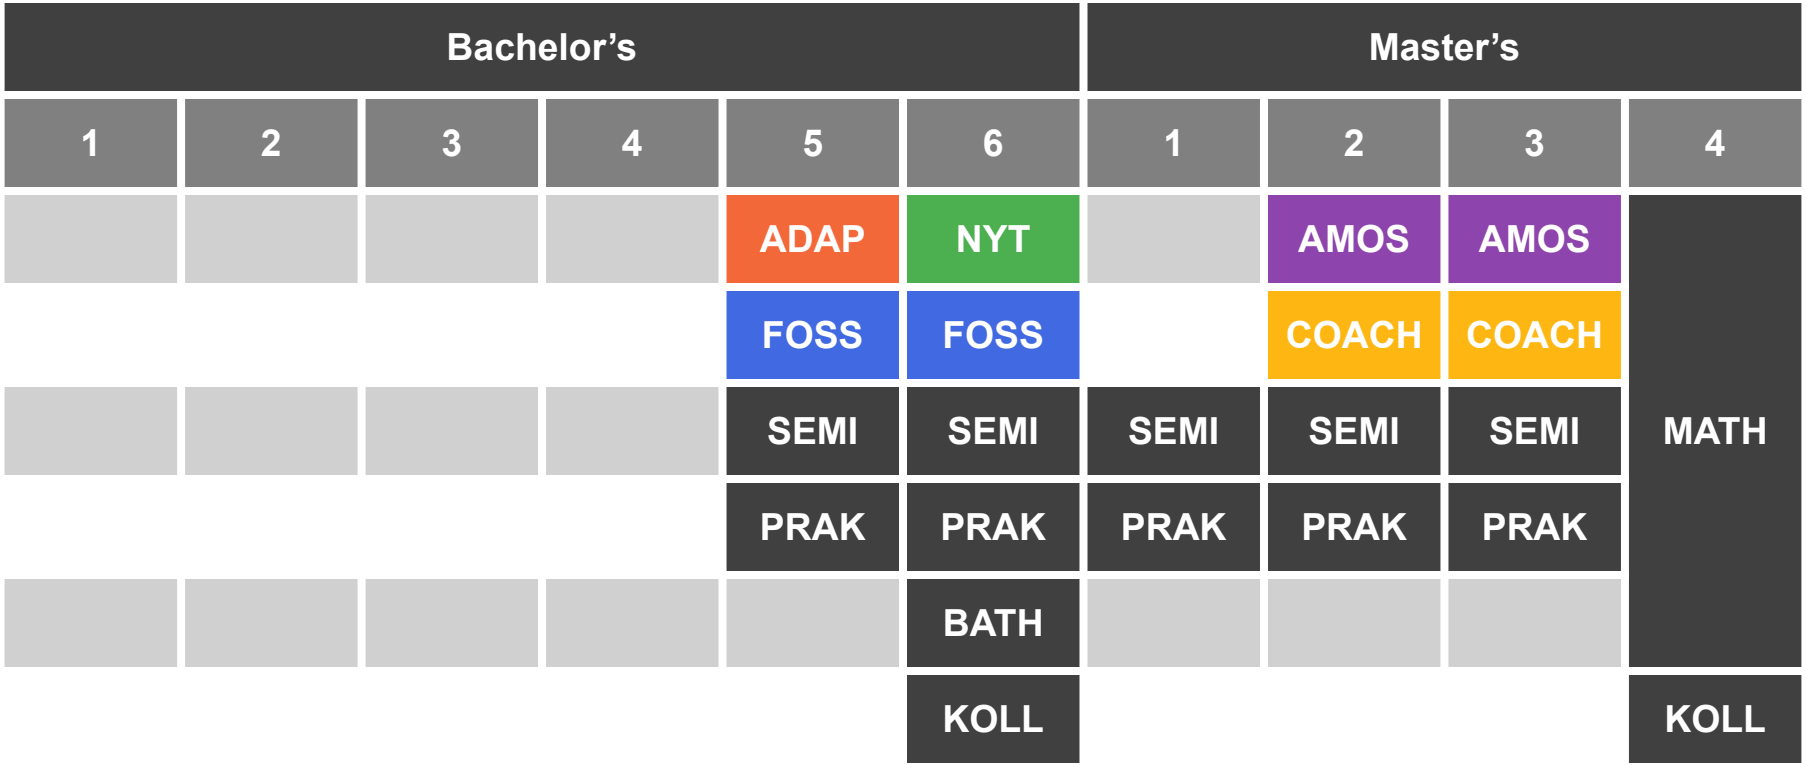

Prerequisites

- None

Required skills

- Ability to read open source code
- Ability to operate open-source software
- Proficiency with tools and command line

Course Position in Curriculum

Courses and Modules

		Courses (Lehrveranstaltungen)			
		Lecture (2 SWS)	Exercise (2 SWS)		Total ECTS
Modules	FOSS	x	x		5

Availability of Modules

		University			
		FAU Erlangen			
Modules	FOSS	x			

x = available
– = not available

FOSS vs. FLOSS vs. COSS vs. PROD

FOSS is not FLOSS nor COSS nor PROD

- But FLOSS or COSS or PROD are still available modules

Please do not take FOSS if you want the old FLOSS or COSS or PROD

FOSS content is different from these other modules

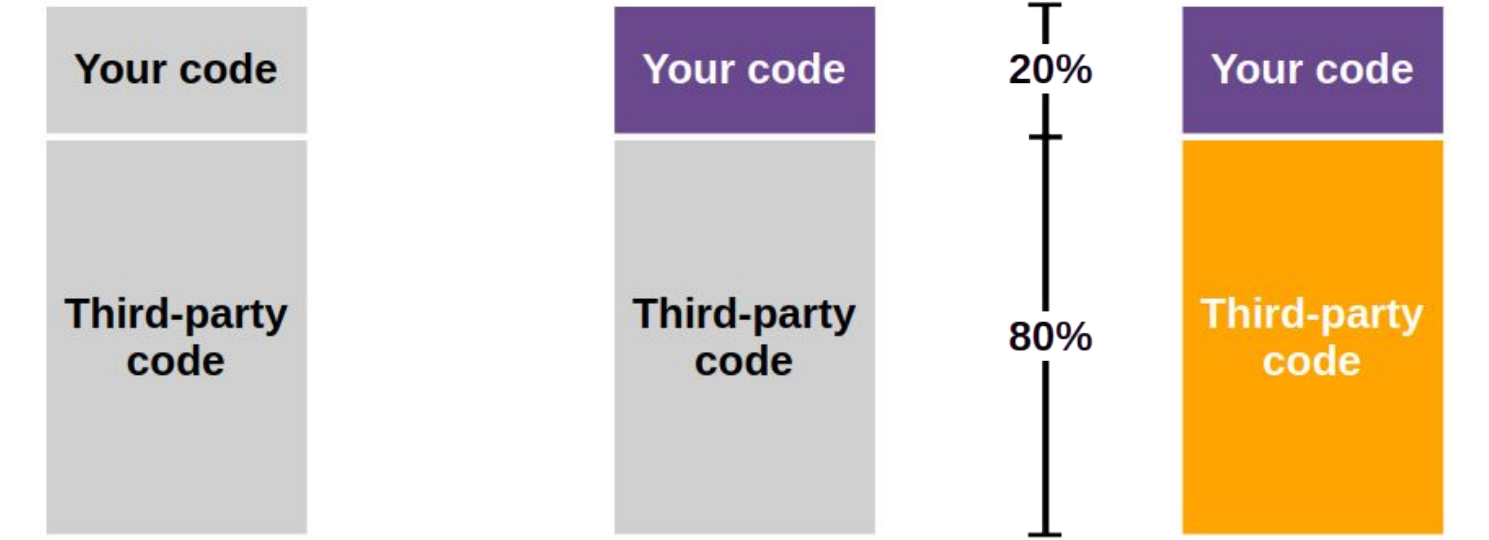

If you take FOSS this semester, you agree to this new FOSS

Course Content

Open source compliance with

- Licenses and
- Regulation

The Scope of Open Source Compliance

Course Overview

A. The software bill of materials

1. The software bill of materials
2. The dependency graph
3. Software composition analysis

B. Open source governance

4. Open-source software licenses
5. Copyleft and intellectual property risks
6. The open source program office

C. License compliance

7. The open source legal notices
8. Efficient engineering workflows
9. Current compliance challenges

D. Regulatory compliance

10. The software supply chain
11. Open source compliance regulation
12. Vulnerability management

Course Grading

Four exercises of different weighting

Miss more than one exercise and you fail the course

Course Management System

Please sign up on https://myc.uni1.de for the course [1]

Make sure your first and last name match your university credentials

[1] Please **use your university email address**; do not use GMX or web.de email addresses

Receiving a Grade for the Course

Course management and exam registration are two separate things

If you want to receive a grade

- You must register through your university's exam registration system
  - Your degree program may have split the course into two (VL + UE)
  - Please check asap that the course is available in your degree program!

Otherwise: No grade

No Oral or Written Exam [1]

[1] You still have to register for the course

Course Language

Class and homework

- Lecturer: English
- Student: English

Course Organization

Course organization a.k.a. information index

- See https://foss.uni1.de

Course schedule

- See Schedule tab on Course organization doc

Work Rhythm

1. Lecture (class discussion)
2. Exercise (homework review)
3. Homework (self-organized)

Course Communication

Announcements are sent by email

- Through email aliases
- Through course management system

Administrative questions to teaching team

- Please ask your questions in the course forum
- For private questions, use the teaching team email alias

Thank you! Any questions?
