When Providing a Product to Customers in Industry

When providing a product to customers in industry, you need to …

1. Know the open source components inside and tell your customers
2. Make sure that the open source licenses agree with your business model
3. Provide complete and correct legal notices from open source components
4. Managing the security risks of the included open source components

These are the four homework exercises of this course

Homework Overview

There will be four exercises with unequal weighting

1. Creation of an SBOM for an open source component
2. Determination of a resulting license for the component
3. Creation of open source legal notices for the component
4. Provision of a security risk assessment of the component

Miss more than one exercise and you fail the course

All submissions are due when the next section starts

Homework 1 / SBOM Creation

You will be assigned a GitHub repository

- Assume this is a proprietary product

Your task is to create an SBOM for the product

- You must determine all standalone dependencies
- You choose your tools; we don’t provide nor recommend

For homework submission

- Upload your SBOM to Moodle in SPDX 2.3 or later
- Answer the questions in this form https://forms.gle/mC3HYP2FgUnUuSMSA

You should look at the form in advance

Homework 2 / Governance

You will be assigned a GitHub repository

- Assume this is a proprietary product

Your task is to create an SBOM for the product

- You must determine all the licenses of the first-level dependencies
- You choose your tools; we don’t provide nor recommend

For homework submission,

- Upload your SBOM to Moodle in SPDX 2.3 or later
- Answer the questions in this form https://forms.gle/khdL9MEkhsQaNZWH8

You should look at the form in advance

Homework 3 / Legal Notices

You will be assigned an open source project

- Assume you will distribute the project as a binary for pay

Your task is to create the legal notices for the project

- You must first create an SBOM and then a legal notices file
- You choose your tools; we don’t provide nor recommend

For homework submission

- Upload the legal notices file in text format
- Upload your SBOM to Moodle in SPDX 2.3 or later
- Answer the questions in this form https://forms.gle/Dvkg8FZqnLJS2q9k6

You should look at the form in advance

Homework 4 / Risk Assessment

You will be assigned a GitHub repository

- Assume that this is a dependency to a product you are selling

Your task is to perform a CRA-compliant risk assessment of the component

- You choose your tools; we don’t provide nor recommend

For submission, answer the questions in this form

- https://forms.gle/Qcje2aB8xFVnsrUb7

You should look at the form in advance

Thank you! Any questions?
